Vision and aims of EJHP Science

EJHP, the official journal of the European Association of Hospital Pharmacists, is distributed to more than 17,000 European hospital pharmacists in 26 European countries, aims to inform pharmacists on all professional, scientific and therapeutic aspects of hospital pharmacy to improve patient care. EJHP Science will offer a high-quality, peer-reviewed platform for the publication of innovative research and informative reviews of relevance to hospital pharmacists.

In the longer term, the vision for EJHP Science includes indexing in key literature databases and the acquisition of an impact factor to firmly establish EJHP Science at the head of international journals on hospital pharmacy.
