

EAHP has launched a survey to collect information on the lessons learned from the COVID-19 pandemic. The survey targets hospital pharmacists. It gathers on the one hand details on the medicines for which shortages were experienced. On the other hand, it takes stock of the experiences made in hospitals during the first few months of the crisis and explores suggestions for improving the future crisis preparedness of hospital pharmacies.

13 different language versions are available.

The survey will remain open until 23 December 2020.
