

Friday, 27 November 2020

Aimed at Controlled Drugs Accountable Officers, Pharmacists and Prescribers this virtual conference will update you on current national developments, including issues arising with the supply and prescription of controlled drugs during COVID-19 and preparing for the potential implementation of Controlled drug legislation which has been enabled to “switch on” flexibilities for the supply of controlled drugs during a pandemic. These flexibilities have not been activated at this time. The conference will also discuss controls for pregabalin and gabapentin, and improve practice learning from case studies.
