

Thursday, 25 November 2021 to Wednesday, 16 March 2022

Dear colleagues, The Société Française de Pharmacie Clinique SFPC (French Society of Clinical Pharmacy) is pleased to announce its 19th Congress, which will be held in Strasbourg, France, from March 13 to 16, 2022, with the theme Pharmaceutical care: at the crossroads of patient management. This event will be an opportunity to see how the evolution of the integrative model of clinical pharmacy is leading us to resize our profession and our practices to integrate the notion of pharmaceutical care, to discover in this context some innovative practices in ambulatory clinical pharmacy and to exchange our professional experiences in the face of exceptional situations such as the COVID-19 health crisis. In addition, each participant can choose to take part in workshops on various topics that will provide an opportunity to deepen professional practice on targeted patient pathways (cardiology, surgery, rheumatology, psychiatry, geriatrics, pediatrics, etc.) or on methods of optimization in the performance of clinical pharmacy acts. Each learner builds his or her own learning path by choosing the workshops that are best suited to his or her practice. Times of exchange, sharing and conviviality will punctuate these days rich in scientific content. Finally, you will be able to discover Strasbourg, a dynamic city through its heritage (architecture, historical districts), its gastronomy but also its university, its European vision (European institutions such as the EDQM and the European Pharmacopoeia), and its ecological approach with regard to its multiple bicycle paths. We expect many of you to participate in this congress. https://sfpc.eu/congres_sfpc/ ^[1]
