

The Management Summit is the fourth in the BEAM series of projects underpinned by the European Association of Hospital pharmacy (see <http://www.eahp.eu/BEAM-Summit> ^[1]). It is under the auspices of the Academy which is part of the educational 'arm' of the EAHP.

The BEAM project is a sponsored training and facilitation series of summits based on the cascade principle of dissemination. Specifically Aspects of Compounding is the 'A' of BEAM (Biotechnology, Evidence-based medicine, Aspects of Compounding and Management). The Summit is 'free' to participants, who are purposefully selected by their national association to attend based on their individual capacity to take the learning back to their country of origin and improve practice.
