Date: Monday 10 November 2014

Time: 0900-1700

Venue: Novotel Brussels Airport

Background

EAHP kindly invites its member associations from Belgium, France, Italy, the Netherlands, Portugal and Spain to participate in an initial meeting aimed at agreeing a process and method for forming a common training framework for hospital pharmacy specialisation in Europe.

With the ultimate intention of ensuring the highest standards of patient care within participating countries' health systems, the establishment of a common training framework will also permit highly skilled and educated health professionals to more easily move between countries and share learning and experience in practice settings.

In this first meeting EAHP invites its member countries who:

- are member countries of the European Union;
- have in place post graduate specialisation programmes for the practice of hospital pharmacy; and,
- have requirements of a legally mandatory nature for individuals to hold the specialisation qualification in order to practice, and be termed, as a hospital pharmacist.

EAHP calculates those countries to be: Belgium, France, Italy, Netherlands, Spain and Portugal.

Meeting outline

The meeting will:

- hear from a representative of the European Commission about the opportunity presented by the new common training framework tool, and how it is intended to operate in practice;
- hold discussions on the various options in relation to qualification harmonisation methodologies, learning from the experiences of other professions (assisted by a presentation from Dirk Bochar, Secretary General of the European Federation of National Engineering Associations [2]);
- conduct an initial comparison of hospital pharmacy specialisation programmes in the 6 countries, with some reference to specialisation programmes in other countries; and,
- aim to agree a future method of working towards a common training framework for hospital pharmacy specialisation in Europe, that includes the involvement of all EAHP member countries, via workshop discussion [3].
