vi) European Statements of Hospital Pharmacy

The European Statements of Hospital Pharmacy were passed in May 2014 following a rigorous delphi consultation process with EAHP's 34 member countries and over 30 European patient and healthcare professional organisations.

Statement 6.2 states "All those involved in medicines use processes must be able to demonstrate their competency in their roles. **Hospital pharmacists should participate in the development of European-wide competency frameworks to ensure standards of best practice are met.**"

The full text of the statements, and other information about formation, is available HERE [16].
