Sunday, 17 April 2016 to Wednesday, 20 April 2016

The XV International Symposium will take place at the Sheraton Santiago Hotel in Santiago, Chile from April 17-20, 2016.

The theme of ISOPP 2016 is Oncology Pharmacy Practice: a Global Perspective. Oncology practice is changing day by day, and the role of oncology pharmacists continues to grow and evolve.

This makes ISOPP’s role as a leading voice for pharmacists who care for patients with cancer ever more important. In conjunction with its 20th anniversary in 2016, ISOPP will once again engage global leaders in oncology pharmacy to find practical solutions that improve patient care. The 2016 Symposium will provide oncology pharmacy professionals with essential updates to enhance their work and examples of best practice from around the world.

The Symposium will feature an educational, career-enhancing program and address leading edge topics in Oncology Pharmacy. There will also be lots of opportunities to network and connect with old friends and new colleagues.
