

Who can apply?

Current undergraduate pharmacy students or young professionals who have graduated within the last two years, and who are studying in or have studied in countries represented by EAHP (as a full member) and/or EPSA are eligible to benefit from the Platform and be connected with the hospitals in order to arrange the internships. Please find the list of EAHP's full member associations [here](#) ^[1] and the members of EPSA [here](#) ^[2]. The internship placements are meant for applicants who want to conduct **an internship abroad**, outside of the country they are studying and outside of the country they are from.

The participating hospitals can be located in any of the member states of the [Council of Europe](#) ^[3].

Students and young professionals that are interested in applying for an internship are required to have a contact person at their faculty that will help the student with the process; likewise, young professionals need to contact the faculty they graduated from for the same purpose. The contact person at the university needs to write a recommendation letter for the internship and to follow the internship together with the intern. This requirement is needed in order for the applicant to be deemed suitable to apply for an internship and to help ensure that the internship runs as smoothly as possible.
