

The 2016 EAHP Statements Survey results are now available!

This is the third survey in the new format of EAHP surveys, which are associated with the European Statements of Hospital Pharmacy. Following successful completion and evaluation of the Baseline survey and the 2015 Statements survey, this survey closes the circle and represents a more in-depth investigation of the status quo of our profession in Statements section 1 (Introductory Statements and Governance), 3 (Production and Compounding) and 4 (Clinical Pharmacy Services).

Data from the survey will help to target EAHP activities more precisely to the most important areas, where the level of Statements' implementation is not sufficient and also to identify the most important barriers in implementation efforts. We believe that the results will also be very important and useful for your national associations as well as for the individual hospital pharmacies.
