

In a new editorial article published on the online European Journal of Hospital Pharmacy, Per Hartvig of Copenhagen University discusses aspects of the “art of medicine”.

In an article entitled “When probability becomes true!” Professor Hartvig reminds readers that the parameters of evidence based medicine does not always lead to every patient receiving the best possible treatment, and considers where the clinical pharmacist must be aware of the limits of their advice.

The full text of the article is available of the EJHP website [here](#) [1].
