

Marking Europe Day (9 May), EAHP is conducting a quick poll of views on what the top issues in hospital pharmacy are that the EU should help to address.

Surveyed options include:

- helping cross border recognition of the hospital pharmacy specialisation
- introducing barcoding of single dose medicines
- improving clinical trial regulation
- addressing the problem of medicines shortage
- encouraging health system change to make full use of hospital pharmacist skills

The poll is available to take part in via the EAHP Facebook page [here](#) <sup>[1]</sup>
