

Webinar: 'Resolution on the implementation of pharmaceutical care'

A step forward in the promotion of pharmaceutical care in Europe

26 November 2020: 3pm – 4pm (CET)

Register [HERE](#) to join the FREE EDQM Webinar!

Pharmacies provide a wide range of services to patients and the general public. Evidence of the value of **pharmaceutical care** continues to grow, and systematic literature reviews and meta-analyses evaluating the impact of community and hospital pharmacy services in healthcare have shown their positive effects on patient outcomes and economic benefits.

On 11 March 2020, the Committee of Ministers of the Council of Europe adopted a new **Resolution CM/Res(2020)3 on the implementation of pharmaceutical care for the benefit of patients and health services**. This resolution defines a framework for promoting and implementing the concept of pharmaceutical care in national health systems.

This webinar will explain the background to the resolution and how it can be used by policy makers and stakeholders. It will also cover the content of the resolution and its added value as well as provide some practical examples on its implementation in daily practice at national level.

This online event is intended for **representatives of national competent authorities, healthcare professionals** (i.e. pharmacists working in hospital and community pharmacies, nurses and physicians) and **academics** working in the domain of pharmacy practice. As pharmaceutical care is a patient-centred approach, the webinar is also open to **patients' associations** and in general to all who are interested in learning more about the European Directorate for the Quality of Medicines and HealthCare (EDQM) and its role in setting quality and safety standards in pharmaceutical practices and pharmaceutical care.

Learn more about the webinar and how to register [HERE](#). Registration is **FREE OF CHARGE!**
