

We would like to invite you to...

THE EVOLUTION OF MEDICATION MANAGEMENT

Medication safety from pharmacy to bedside

Satellite Symposium at the 21st Congress of the EAHP

Thursday, March 17 | 15:00-16:30 | Hall 1.61-1.62

The aim of this symposium is to discuss the evolution of the medication management process as an instrument to reduce errors at all stages of medication management workflow, from preparation and dispensing to administration.

This symposium is a must for all hospital pharmacists, since it is designed to address the common theme of more time pressure and less resources and the importance of creating a safer environment, for all caregivers and patients, in the medication management pathway.

15:00 Chairman introduction and welcome

Prof. Pascal Bonnabry – Dir. Pharmacy HUG, Associate Professor, Section of Pharmaceutical Sciences, Geneva University Hospitals, Switzerland

15:05 How to achieve high levels of quality and safety for IV compounding and preparation workflow

Mag. Dr. Robert Terkola – aPhP - College of Pharmacy University of Florida, Gainesville, USA and CEO Health-Concepts E.U., Mödling, Austria

15:25 How improving the quality of medication management helps to reduce medication errors
