IMPLANTATION OF A SAFETY STRATEGY FOR DRUG STORAGE IN A PHARMACY SERVICE.

Virgen del Rocio University Hospital, Hospital Pharmacy, Seville, Spain.

RESULTS:

- Four error related with dispensation were registered along three months before intervention, however any error has occurred the quarter after that. In addition, after an audit, all the photosensitivity drug’s are stored in optimal conditions.
- From 15 technicians surveyed, 90% say to know the strategy implemented and consider it like useful.

CONCLUSION:

- This strategy has helped the pharmacy service to improve the storage and dispensing quality, avoiding medication error and providing the drugs in optimal conditions to the patients, increasing their safety.
